### **DETAILED ACTION**

1.0 The finality of the last Office action is withdrawn, and the amendment after final on July 28, 2004 has been entered. Claims 1-4, 7-8, 13-15, 17-24, & 29-31 are pending.

#### ***Specification***

2.0 The abstract should be submitted on a separate page from the disclosure. Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 112***

3.0 The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4.0 Claims 1-4, 7-8, 13-15, 17-24, & 29-31 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 13 recites a prioritization unit sending a test signal to terminal units and prioritizing each transmission test signal based on achievable rates. This feature is new matter because it is not supported by the original disclosure. According to the second paragraph on page 7 of the specification, a plurality of test signals are transmitted to terminal units, not just a test signal as claimed. In addition, the specification fails to teach how "achievable data rates" are determined by sending just a signal to prioritize the transmission. Claim 29 has the same problems.

***Claim Rejections - 35 USC § 112***

5.0 The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4, 7-8, 13-15, 17-24, & 29-31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Referring to Claim 13, line 4, it is not clear to what test signal "each test signal" refers to because only one test signal is recited at line 3. In addition, the text in lines 3-6 is confusing because it is not clear how each signal is related to "achievable data rates." Claim 29 has the same problems.

***Response to Amendment***

6.0 Applicant's arguments with respect to claims 1-4, 7-8, 13-15, 17-24, & 29-31 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

7.0 Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
